

APLS Body Guard HazRem

is a rugged, disposable absorbent body bag that minimizes the risk of service provider exposure to bacteria-laden body fluids and chemical and biological agents.

The bag's innovative design – thermal seals, finished edges, treated nylon backing, and a heavy duty, fluid-proof zipper – creates a leak-proof inner chamber that protects service providers from bacteria-laden body fluids and chemical and biological agents.

Constructed with a highly absorbent cellulose core that retains over six liters of fluid, APLS Body Guard HazRem is designed to work independently or with a stretcher for staging, storing, and transporting deceased personnel. APLS Body Guard HazRem features a surface-active agent for odor control and the rugged design lessens the chance of environmental contamination.

FEATURES :

- Leak-proof backing and sealed edges
- Fluid-proof and airtight zipper
- Vapor and fluid leak protection
- Contains up to 6.7 liters of blood and bodily fluid
- Eight (8) handles allow for carrying and easy transport
- Complete concealment capability through zippered top
- Surface-active agent for odor control
- Pocket secures patient documents
- Supports 420 – 450 lbs. (190.51 – 204.12 kg), wet or dry
- Compressed vacuum packed

PART No. and NSN No.

Part XAPLSV-3378CB-1

NSN 9930-01-597-1336

SPECIFICATIONS :

- | | | |
|---|---|--------------------------------------|
| • Finished Product Size:
36" x 91"
(91.44 cm x 231.14 cm) | • Target Absorbency (H ₂ O):
6,500 – 6,850 grams (Target
= 6,850 grams, or 6.8 liters) | • Pad Thickness: 0.125"
(0.32 cm) |
